

Date	Started	Calc.	Cards	Fog	Glory?

Can this lighten my darker
Dark Lady days?

See 'scoring' in the handbook

A reckoning

I started out with how many cards

"Calc" is started times the number now showing on the
countdown card

Cards ... how many are there atop the countdown card?

Fog cards left in the pile, times 2

Ends in glory? .. 'Glory' is ... Calculate + Cards + Fog
(Minus 30 when I play in easy mode of course.)

Reminders to me

- I don't take a location card for my starting position.
- I can't move and search, but must wait until she comes to my location.
- If I hold clues, she runs every time I search - even if she wasn't there!
- Fog cards aren't discarded unless instructed - they go back to the pile.
