

Date	Start	Calc.	Cards	Fog	Bon	Glory?

How did I fare?

Based on 'scoring' in the main-game manual, and in the expansion leaflet.

Start - I started out with how many cards?

Calc is start multiplied by the number now showing on the countdown card.

Cards ... how many are there on top of the countdown card?

Fog - how many fog cards are left in the pile: times 2

- Bon - bonuses
- if played in **easy** mode, -30
 - Fair Youth +20 or -20 : confront him and Lady together +30
 - Rendezvous +15 if you find her
 - Elusive poet -10 if used
 - Aggressive poet +10 if used

Did it end in glory? .. 'glory' is the sum, of course.

The Darker Ladies score as in the base game.

Reminders to me

- I don't take a location card for my starting position (except very easy).
- I can't move and search, but must hope she comes to my location.
- If I hold clues, she runs every time I search - even if she wasn't there!
- Fog cards aren't discarded unless instructed - they go back to the pile.
